

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Inventor: Scot Young

Date: February 20, 2004

Title: A WARNING SIGN

---

PRELIMINARY AMENDMENT

Hon. Commissioner for Patents  
Patent and Trademark Office  
Alexandria, Virginia 22313-1450

Sir:

Attached is a preliminary amendment to be entered in the above case. A verbatim copy of GB 0325102.2 was filed as the original application document and this preliminary amendment conforms the application and claims to USPTO format and standards. The abstract has been changed to delete reference to drawing numbers and "means," headings added and claims have been renumbered and revised to avoid multiple dependencies. The prior claims should be cancelled and new claims 18-33 substituted therefore. The new claims correspond to the old and are substantially identical. There is no corresponding claim to original Claim 17, which claimed the device shown in the drawings. No substantive changes are intended and none are believed to be present.

Also enclosed is a certified copy of GB 0325102.2.

Respectfully submitted,

  
Wm. Bruce Day USPTO # 29,059
